

How to sign in to Chrome and Enable Sync to have bookmarks and passwords follow you

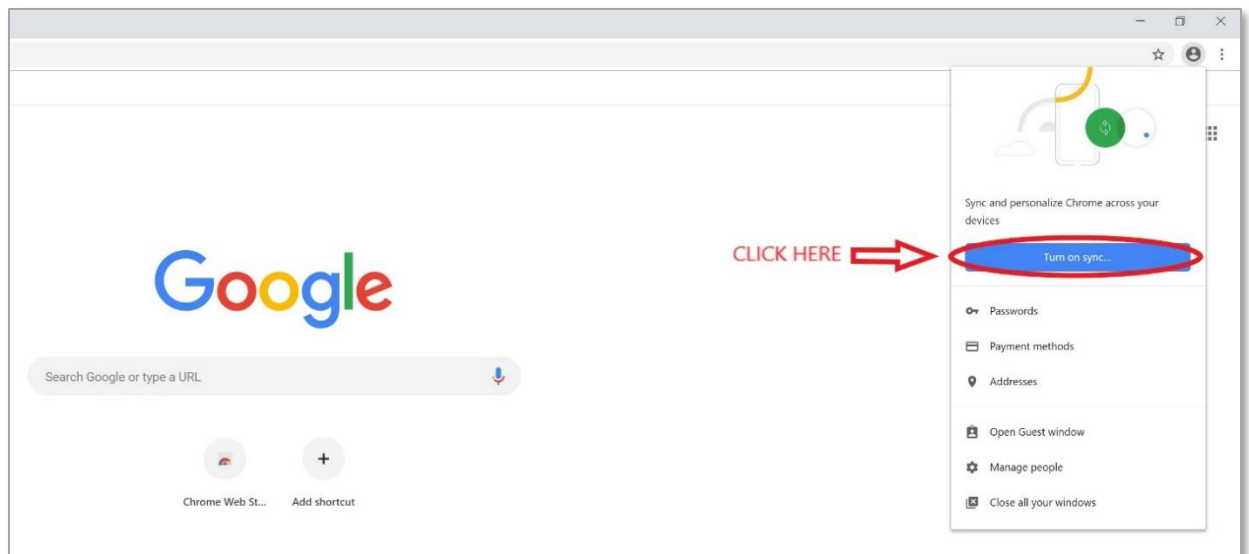

1.) Open Google Chrome

2.) Click on the Spanner  (top right)

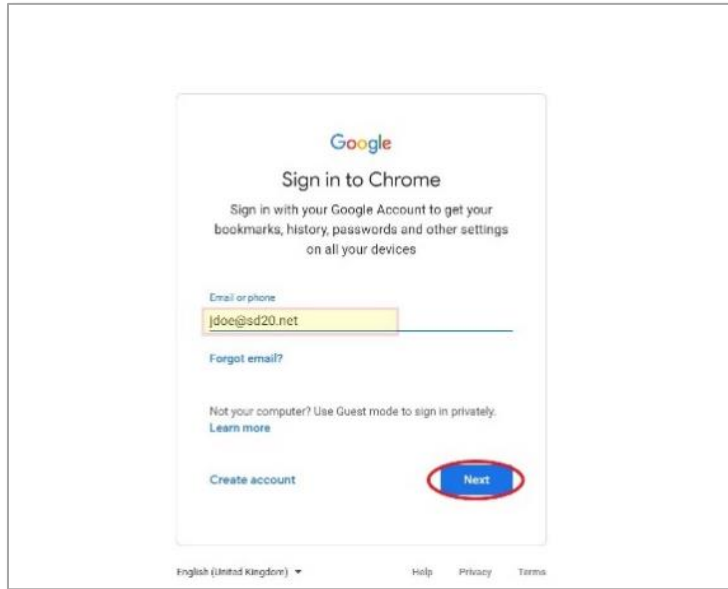

3.) There will be a drop down window. Click on the button "Turn on sync..."

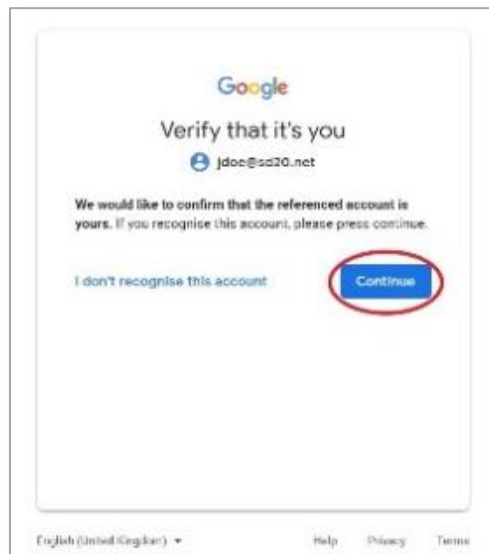

4.) This will take you to a sign in window. Enter your **username** (the one that you use to log in to your computer), followed by **@sd20.net**

Example: **jdoo@sd20.net**

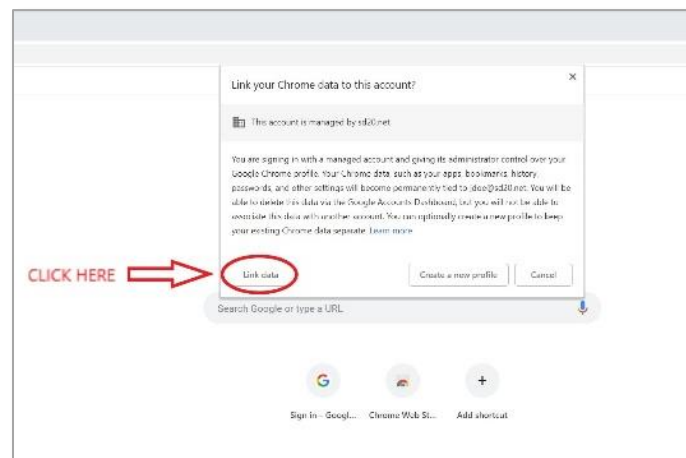

Then click "Next"

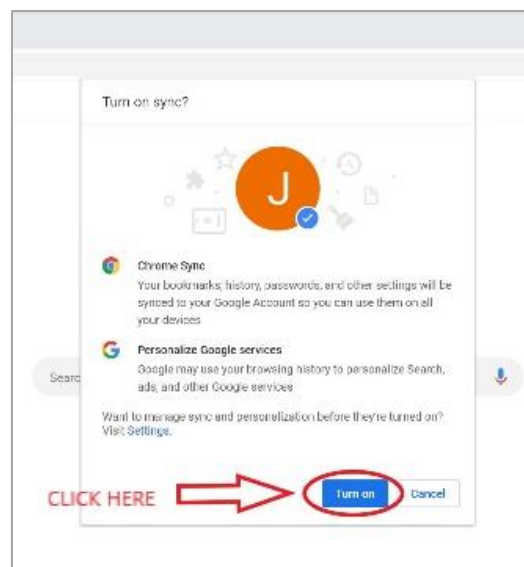

5.) You will be directed to a verification window. Verify that the username shown matches your credentials and then click "Continue".

- 6.) Another window will open asking if you want to link your Chrome data to this account. Click "Link Data" in order to link your apps, bookmarks, history, passwords and other settings to your account.

- 7.) Lastly, you will be asked to turn on sync. Click "Turn On". Your bookmarks, history, passwords and other settings will be synced to your Google account so you can use them on any device that you log into.

- 8.) You are done! All of your passwords, bookmarks, apps, history and settings will follow you no matter what device that you are on. All you have to do is log into Google Chrome from any computer.
